

Slide 1: Title Slide

Executive Decision Report & Capstone Presentation

Retail Sales Analytics & Strategic Growth Plan

Prepared For: C-Suite Decision Makers

Date: 22.09.2026

Slide 2: Executive Summary

Objective

Synthesize analytical findings into an executive-ready Business Intelligence report.

Key Finding

The business generates strong top-line revenue, but aggressive discounting strategies are heavily eroding profit margins.

Action Plan

- Implement standardized discount caps.
- Focus marketing on the highly profitable Professional segment.
- Optimize inventory for top-performing regions.

Slide 3: Methodology

Data Ingestion

Extracted and cleaned the raw business dataset.

Exploratory Data Analysis (EDA)

Analyzed statistical distributions, identified anomalies, and formulated business hypotheses.

Visualization

Developed a dynamic, interactive business dashboard using Streamlit.

Slide 4: Key Revenue Drivers

Top Customer Segment

Professional customers drive the highest Average Order Value (AOV) and overall revenue.

Top Product Category

Course Access and Learning Kits account for the highest sales volume.

Top Geographies

Bengaluru, Chennai, and Hyderabad act as the primary revenue hubs.

Slide 5: Risk Areas Identified

Margin Erosion

A strong negative correlation exists between discount rates and profit margins. Discounts exceeding 15% frequently result in negative profitability.

Data Quality Vulnerabilities

Missing city data and unstandardized text entries in the raw pipeline risk polluting automated downstream analytics.

Payment Failures

Pending and failed payment statuses delay revenue realization and increase customer churn risk.

Slide 6: Strategic Recommendation 1

Recommendation

Optimize Discounting Strategy

Action

- Implement a hard cap of 10% on maximum allowable discounts across all product categories.
- Phase out 100% discount promotions.

Impact

Immediately stabilizes baseline profitability and prevents loss-making transactions.

Slide 7: Strategic Recommendation 2

Recommendation

Target the Professional Segment

Action

Reallocate 30% of the marketing budget from the Student and Fresher segments toward Professional customers, who demonstrate higher purchasing power.

Impact

Increases overall Average Order Value (AOV) and potential lifetime customer value.

Slide 8: Strategic Recommendation 3

Recommendation

Streamline Data Governance

Action

- Implement front-end validation rules on the e-commerce checkout page.
- Prevent missing city data.
- Standardize quantity inputs.

Impact

Reduces data engineering overhead and ensures greater accuracy in future BI reporting.

Slide 9: Implementation Timeline

Month 1

Enforce new discount caps in the point-of-sale system and update checkout data validation rules.

Month 2

Launch a targeted marketing campaign aimed at the Professional segment in Tier 1 cities.

Month 3

Review quarterly dashboard metrics to assess improvements in AOV and Profit Margin.

Slide 10: ROI Projections

Revenue Growth

Projected 12% increase in top-line revenue driven by segment targeting.

Margin Improvement

Expected 18% improvement in average profit margin due to discount capping.

Payback Period

Strategic shifts require minimal capital expenditure, resulting in a projected positive ROI within the first operating quarter.
